

Dr. Kathrin Goldammer
Managing Director
Reiner Lemoine Institut (RLI)

Fields of Expertise:

Energy technology, Hydrogen, E-mobility, Energy markets

Professional Experience

2016 – present	Managing Director of Reiner Lemoine Institut (RLI) and co-founder/CEO of software company Localiser RLI GmbH
2013-2016	Head of the Energiewende Research Forum Office for the German Federal Ministry of Education and Research
2012-2013	Energy team head at the Institute for Advanced Sustainability Studies e.V., IASS
2008-2012	Several positions at energy utilities and consulting firms
2004-2007	Researcher in accelerator Physics with research stays in Sweden, the USA and Japan
1981	Doctorate in Physics, Humboldt-University of Berlin
2004	Diploma in Electrical Engineering, Technical University of Berlin

Special Assignments

2022 – present	Representative of the Berlin climate mitigation council
2022 – present	Member of the hydrogen-roadmap advisory board of the federal state of Baden-Wurttemberg
2021	Co-founder of the international Women in Green Hydrogen network
2021 - present	Spokesperson for energy technology in the German capital region
2016 - present	member of the scientific advisory council of the "Powertrains and Energy Systems of Tomorrow" conference of ATZ

About RLI

The Reiner Lemoine Institute, RLI in short, is an independent non-profit research institute that contributes to a transformation towards a sustainable energy supply based on 100% renewable energy. Its three research fields are called “Transformation of Energy Systems”, “Mobility with Renewable Energies” and “Off-Grid Systems”. RLI conducts applied research and consulting and pursues the goal of scientifically supporting the long-term transition of the energy system towards renewable energies – both in Europe as well as internationally. The institute is named after German engineer and solar entrepreneur Reiner Lemoine, who founded a philanthropy in 2006 shortly before his death. His foundation then founded the institute in 2010.
