

Agenda

Women in leadership in the energy sector

An activity of the Japanese-German
Energy Partnership Team

01.03.2023

17:30 – 19:00 h (JST)

Only one in five leadership roles in the energy sector are held by women, according to the World Economic Forum's Global Gender Gap Report 2022. Although studies show how important (gender) diversity is for innovation and good business, the energy sector is still a male dominated one. As team of the Japanese-German Energy Partnership we strive for diversity and tolerance by empowering and encouraging women to advance their career in the energy field in both countries.

For this event we invited two inspiring role models from the energy sector to speak about their experience, share their (success) stories and answer the audience's questions about their work in leadership positions.

Language:	English
Venue:	German Chamber of Commerce and Industry in Japan (AHK Japan)
Fee:	Free of charge
Catering:	Hot and cold beverages along some sweet and savoury finger food will be provided
Supported by:	German-Japanese Energy Transition Council (GJETC)
