About Arepo

Founded in 2009, the Berlin-based consultancy Arepo advises political decision makers, organizations and companies on their strategic decisions regarding projects and programs in all areas of climate protection with a focus on renewable energy, energy efficiency, sustainable energy systems, climate finance, climate protection and biodiversity. The services include studies, analyses and models of energy systems, climate policies and power markets as well as policy analyses and evaluations in the energy and climate sector. Arepo employs an interdisciplinary team of experts in the fields of economics, environmental engineering, political science, geography, agricultural economics and communications.
